## Objective

Results-driven web developer with a strong focus on backend development and working knowledge of frontend technologies. Skilled in building reliable, user-friendly applications and solving complex problems with efficient, innovative solutions. Eager to contribute to impactful projects that deliver meaningful user experiences.

## Skills

- Backend Web Development
- Frontend Web Development
- Backend Mobile Development
- API Development
- Database Management
- Knowledgeable with Relational Databases
- Knowledgeable with Non-Relational Databases

## Experience

### Fullstack Web Developer Internship Abicom Software Corp

January 2025 - May 2025

Built the backend for a web offerwall API to handle data and user interactions. Implemented a headless CMS to streamline content management across the platform. Developed features to add, edit, and manage dashboard content. Collaborated on the project using Next.js to ensure seamless integration and performance.

### Web Developer Freelance

March 2025

Developed a user-friendly, product-focused one-page website using Next.js and Tailwind CSS. Integrated third-party APIs for dynamic product management and real-time updates. Ensured responsive design and smooth performance across all devices and browsers.
